

2005-2006

# Fundamentals and Principles of Ophthalmology

AMERICAN ACADEMY  
OF OPHTHALMOLOGY  
*The Eye M.D. Association*

SECTION

2

Basic and Clinical Science Course

# Contents

General Introduction . . . . . xv

Objectives . . . . . 1

## **PART I Anatomy . . . . . 3**

### **1 Orbit and Ocular Adnexa . . . . . 5**

Orbital Anatomy . . . . . 5

Orbital Volume . . . . . 5

Bony Orbit . . . . . 5

Orbital Margin . . . . . 5

Orbital Roof . . . . . 5

Medial Orbital Wall . . . . . 6

Orbital Floor . . . . . 8

Lateral Orbital Wall . . . . . 8

Orbital Foramina, Ducts, Canals, and Fissures. . . . . 9

Periorbital Sinuses . . . . . 12

Cranial Nerves . . . . . 13

Ciliary Ganglion . . . . . 13

Branches of the Ciliary Ganglion . . . . . 15

Short Ciliary Nerves. . . . . 15

Extraocular Muscles . . . . . 15

Extraocular Muscle Insertions . . . . . 15

Extraocular Muscle Distribution in the Orbit . . . . . 16

Extraocular Muscle Origins . . . . . 16

Blood Supply to the Extraocular Muscles . . . . . 16

Innervation of the Extraocular Muscles . . . . . 18

Connective Tissue Relationships . . . . . 20

Extraocular Muscle Structure . . . . . 20

Eyelids . . . . . 21

Anatomy. . . . . 21

Vascular Supply of the Eyelids . . . . . 29

Lymphatics of the Eyelids . . . . . 29

Accessory Eyelid Structures . . . . . 30

Lacrimal Gland and Excretory System . . . . . 31

Lacrimal Gland . . . . . 31

Accessory Glands. . . . . 34

Lacrimal Excretory System . . . . . 34

Conjunctiva . . . . . 36

Tenon's Capsule . . . . . 37

Vascular Supply and Drainage of the Orbit . . . . .	38
Posterior and Anterior Ciliary Arteries . . . . .	38
Vortex Veins . . . . .	40
<b>2 The Eye . . . . .</b>	<b>43</b>
Topographic Features of the Globe . . . . .	43
Precorneal Tear Film . . . . .	44
Cornea . . . . .	45
Characteristics of the Central and Peripheral Cornea . . . . .	45
Epithelium and Basal Lamina . . . . .	45
Nonepithelial Cells . . . . .	45
Bowman's Layer . . . . .	45
Stroma . . . . .	46
Descemet's Membrane . . . . .	47
Endothelium . . . . .	47
Sclera . . . . .	49
Limbus . . . . .	51
Anterior Chamber . . . . .	52
Trabecular Meshwork . . . . .	54
Uveal Trabecular Meshwork . . . . .	56
Corneoscleral Meshwork . . . . .	56
Pericanalicular Connective Tissue . . . . .	57
Schlemm's Canal . . . . .	58
Collector Channels . . . . .	58
Gonioscopy of the Chamber Angle—Clinical Anatomy . . . . .	59
Uveal Tract . . . . .	61
Iris . . . . .	62
Stroma . . . . .	62
Vessels and Nerves . . . . .	64
Posterior Pigmented Layer . . . . .	64
Dilator Muscle . . . . .	64
Sphincter Muscle . . . . .	65
Ciliary Body . . . . .	66
Ciliary Epithelium and Stroma . . . . .	66
Ciliary Muscle . . . . .	67
Choroid . . . . .	69
Bruch's Membrane . . . . .	70
Choriocapillaris . . . . .	71
Lens . . . . .	73
Capsule . . . . .	74
Epithelium . . . . .	74
Fibers . . . . .	76
Zonule (Suspensory Ligament) . . . . .	76
Retina . . . . .	76
Retinal Pigment Epithelium . . . . .	77
Neurosensory Retina . . . . .	79
Stratification of the Neurosensory Retina . . . . .	84

Macula . . . . .	86
Ora Serrata . . . . .	88
Vitreous . . . . .	89

**3 Cranial Nerves: Central and Peripheral Connections . . . . . 93**

Cranial Nerve I (Olfactory) . . . . .	93
Cranial Nerve II (Optic Nerve) . . . . .	93
Intraocular Portion . . . . .	95
Intraorbital Portion . . . . .	101
Intracanalicular Portion . . . . .	102
Intracranial Portion . . . . .	102
Blood Supply of the Optic Nerve . . . . .	102
Cranial Nerve III (Oculomotor) . . . . .	108
Pathways for the Pupil Reflexes . . . . .	110
Light Reflex . . . . .	110
Near Reflex . . . . .	111
Cranial Nerve IV (Trochlear) . . . . .	111
Cranial Nerve V (Trigeminal) . . . . .	112
Divisions of Cranial Nerve V . . . . .	114
Cranial Nerve VI (Abducens) . . . . .	116
Cranial Nerve VII (Facial) . . . . .	117
Cavernous Sinus . . . . .	119
Other Venous Sinuses . . . . .	119
Circle of Willis . . . . .	119

**PART II Embryology . . . . . 123**

**Glossary . . . . . 125**

**4 Ocular Development . . . . . 129**

Introduction . . . . .	129
Growth Factors . . . . .	129
Homeobox Genes . . . . .	130
Neural Crest Cells . . . . .	131
Embryogenesis . . . . .	133
Organogenesis of the Eye . . . . .	136
Neurosensory Retina . . . . .	138
Retinal Pigment Epithelium . . . . .	144
Optic Nerve . . . . .	144
Lens . . . . .	145
Vitreous . . . . .	146
Choroid . . . . .	149
Cornea and Sclera . . . . .	150
Anterior Chamber, Angle, Iris, and Ciliary Body . . . . .	153
Vascular System . . . . .	155
Periocular Tissues and Eyelids . . . . .	156
Realignment of the Globe . . . . .	158

<b>5</b>	<b>Congenital Anomalies</b>	<b>159</b>
	Genetic Influences	159
	Nongenetic Teratogens	160
	Anophthalmos, Microphthalmos, and Nanophthalmos	162
	Cyclopia and Synophthalmia	163
	Orbital Cyst and Cryptophthalmos	165
	Developmental Anomalies of the Cornea	167
	Congenital Anterior Chamber Anomalies	168
	Abnormalities of the Iris	169
	Colobomas	170
	Abnormalities of the Lens	172
	Abnormalities of the Retina	173
	Retinal Pigment Epithelium	173
	Abnormalities of the Optic Disc and Nerve	173
	Persistent Fetal Vasculature	175
	Abnormalities of Pigmentation	175
	Orbital Dermoid Cyst	178
<b>PART III</b>	<b>Genetics</b>	<b>179</b>
	<b>Introduction</b>	<b>181</b>
	Terminology	181
	Glossary	181
<b>6</b>	<b>Molecular Genetics</b>	<b>199</b>
	DNA, Genes, and Chromosomes	199
	DNA	199
	Chromosomal Structure	204
	Gene Transcription	205
	Transcription Factors and Regulation	206
	Creation of RNA from DNA	209
	Processing of mRNA	209
	Intron Excision	209
	Alternative Splicing, Isoforms	209
	Methylation	210
	X-Inactivation (Lyonization)	210
	Imprinting	210
	Gene Translation	210
	Protein Synthesis	210
	DNA Replication	212
	DNA Repair	212
	DNA Damage	212
	Mismatch Repair	213
	Mutations and Disease	214
	Requirements for Identifying a Disease-Producing Mutation	214
	Mutations	214
	Cancer Genes	215

Mitochondrial Genome . . . . .	215
Genetic Code . . . . .	215
Genomic Structure . . . . .	217
Mitochondrial Disease . . . . .	217
The Search for Genes in Specific Diseases . . . . .	220
Synteny . . . . .	220
Cytogenetic Markers (Morphologically Variant Chromosomes) . . . . .	221
Gene Dosage . . . . .	221
Association . . . . .	221
Linkage . . . . .	222
Positional Cloning . . . . .	225
Candidate Gene Approaches . . . . .	226
Molecular Manipulation and Analysis of DNA . . . . .	227
Recombinant Genetics . . . . .	227
Polymerase Chain Reaction . . . . .	227
Mutation Screening . . . . .	230
Transgenic and Knockout Animals . . . . .	231
Gene Therapy . . . . .	237
Replacement of Absent Gene Product in X-Linked and Recessive Disease . . . . .	237
Strategies for Dominant Diseases . . . . .	237

## **7 Clinical Genetics . . . . . 239**

Terminology: <i>Hereditary, Genetic, Familial, Congenital</i> . . . . .	239
Genes and Chromosomes . . . . .	241
Alleles . . . . .	242
Mitosis . . . . .	244
Meiosis . . . . .	244
Segregation . . . . .	244
Independent Assortment . . . . .	244
Linkage . . . . .	246
Chromosomal Analysis . . . . .	246
Indications . . . . .	246
Preparation . . . . .	247
Aneuploidy of Autosomes . . . . .	249
Mosaicism . . . . .	251
Etiology of Chromosomal Aberrations . . . . .	253
Mutations . . . . .	255
Polymorphisms . . . . .	256
Genome, Genotype, Phenotype . . . . .	256
Single-Gene Disorders . . . . .	257
Variability . . . . .	257
Penetrance . . . . .	258
Expressivity . . . . .	258
Pleiotropism . . . . .	259
Racial and Ethnic Concentration of Genetic Disorders . . . . .	259
Patterns of Inheritance . . . . .	260
Recessivity Versus Dominance . . . . .	260

Autosomal Recessive Inheritance . . . . .	261
Autosomal Dominant Inheritance . . . . .	265
X-Linked Inheritance . . . . .	266
Maternal Inheritance . . . . .	269
Lyonization . . . . .	269
Polygenic and Multifactorial Inheritance . . . . .	273
Pedigree Analysis . . . . .	275
Genetic Counseling . . . . .	276
Issues in Genetic Counseling . . . . .	277
Prenatal Diagnosis . . . . .	278
Pharmacogenetics . . . . .	278
Clinical Management of Genetic Disease . . . . .	280
Accurate Diagnosis . . . . .	280
Complete Explanation of the Disease . . . . .	280
<i>Treatment of the Disease Process</i> . . . . .	280
Genetic Counseling . . . . .	282
Referral to Providers of Support for Disabilities . . . . .	282

**PART IV Biochemistry and Metabolism . . . . . 283**

**Introduction . . . . . 285**

<b>8 Tear Film . . . . .</b>	<b>287</b>
Lipid Layer . . . . .	287
Aqueous Phase . . . . .	289
Mucin Layer . . . . .	291
Tear Secretion . . . . .	291
Tear Dysfunction . . . . .	294

<b>9 Cornea . . . . .</b>	<b>297</b>
Epithelium . . . . .	299
Bowman's Layer . . . . .	299
Stroma . . . . .	300
Descemet's Membrane and Endothelium . . . . .	301

<b>10 Iris and Ciliary Body . . . . .</b>	<b>303</b>
Aqueous Humor Dynamics . . . . .	304
Eicosanoids . . . . .	305
Neurotransmitters, Receptors, and Signal Transduction Pathways . . . . .	308
Miotics . . . . .	309
Mydriatics . . . . .	309
Calcium Channels and Channel Blockers . . . . .	310
Signal Transduction Pathways in the Iris and Ciliary Body . . . . .	310
Signal Transduction . . . . .	310
Receptor-Effector Coupling . . . . .	311
Cyclic AMP and Polyphosphoinositide Turnover . . . . .	311
Receptors . . . . .	312

<b>11</b>	<b>Aqueous Humor</b>	<b>315</b>
	Composition of the Aqueous Humor	315
	Inorganic Ions	317
	Organic Anions	317
	Carbohydrates	318
	Glutathione and Urea	318
	Proteins	318
	Growth Modulatory Factors	320
	Oxygen and Carbon Dioxide	322
	Clinical Implications of Breakdown of the Blood–Aqueous Barrier	322
<b>12</b>	<b>Lens</b>	<b>323</b>
	Structure of the Lens	323
	Capsule	323
	Epithelium	324
	Cortex and Nucleus	324
	Chemical Composition of the Lens	325
	Membranes	325
	Lens Proteins	325
	Physiologic Aspects	328
	Lens Metabolism and Formation of Sugar Cataracts	330
	Energy Production	330
	Sugar Cataracts	330
<b>13</b>	<b>Vitreous</b>	<b>333</b>
	Composition	333
	Collagen	333
	Hyaluronan	335
	Soluble and Fibril-Associated Proteins	337
	Zonular Fibers, Lipids, and Low-Molecular-Weight Solutes	337
	Biochemical Changes With Aging and Disease	338
	Vitreous Liquefaction and Posterior Vitreous Detachment	338
	Myopia	338
	Vitreous as an Inhibitor of Angiogenesis	338
	Injury With Hemorrhage and Inflammation	339
	Involvement of Vitreous in Macular Hole Formation	339
	Genetic Disease Involving the Vitreous	339
	Enzymatic Vitreolysis	339
<b>14</b>	<b>Retina</b>	<b>341</b>
	Neural Retina—The Photoreceptors	341
	Rod Phototransduction	341
	“Rim” Proteins	344
	Outer-Segment Energy Metabolism	344
	Cone Phototransduction	345
	Trivariant Color Vision	345
	Genetic Approaches to Photoreceptor Function and Dysfunction	347
