

Taub's PRINCIPLES OF COMMUNICATION SYSTEMS

4e

Herbert Taub | Donald L Schilling | Goutam Saha

CONTENTS

Preface

xiii

1. Introduction: Signal and Spectra

1

1.1 An Overview of Electronic Communication Systems 1

Self-Test Questions 11

1.2 Signal and its Properties 11

Self-Test Questions 22

1.3 Fourier Series Expansion and its Use 24

Self-Test Questions 37

1.4 The Fourier Transform 37

Self-Test Questions 54

1.5 Orthogonal Representation of Signal 54

Self-Test Questions 66

Matlab 67

Summary 76

Problems 76

References 84

2. Amplitude-Modulation Systems

85

2.1 Need for Frequency Translation 86

2.2 Double Side Band—Suppressed Carrier (DSB-SC) Modulation 88

Self-Test Questions 95

2.3 Amplitude Modulation: Double Side Band with Carrier (DSB-C) 95

Self-Test Questions 104

2.4 Single Side Band Modulation (SSB) 105

Self-Test Questions 112

2.5 Other AM Techniques and Frequency Division Multiplexing 112

Self-Test Questions 119

2.6 Radio Transmitter and Receiver 119

Self-Test Questions 127

Matlab 128

Summary 134

Problems 134

References 136

3. Angle Modulation

137

- 3.1 Angle Modulation 138
 - Self-Test Questions* 142
- 3.2 Spectrum of Tone Modulated Signal 142
 - Self-Test Questions* 152
- 3.3 Arbitrary Modulated FM Signal 152
 - Self-Test Questions* 155
- 3.4 FM Modulators and Demodulators 155
 - Self-Test Questions* 164
- 3.5 Stereophonic FM Broadcasting 164
 - Self-Test Questions* 168
 - Matlab* 169
 - Summary* 173
 - Problems* 173
 - References* 178

4. Pulse Modulation and Digital Transmission of Analog Signals

179

- 4.1 Analog to Digital: The Need 180
 - Self-Test Questions* 192
- 4.2 Pulse Amplitude Modulation and Concept of Time Division Multiplexing 192
- 4.3 Pulse Width Modulation and Pulse Position Modulation 202
 - Self-Test Questions* 205
- 4.4 Digital Representation of Analog Signal 205
 - Self-Test Questions* 219
- 4.5 Certain issues in Digital Transmission 219
- 4.6 Differential Pulse Code Modulation 230
- 4.7 Delta Modulation 235
 - Self-Test Questions* 243
- 4.8 Voice Coders (Vocoders) 243
 - Self-Test Questions* 251
 - Matlab* 253
 - Summary* 259
 - Problems* 260
 - References* 267

5. Digital Modulation and Transmission

268

- 5.1 Binary Phase Shift Keying (BPSK) 269
- 5.2 Differential Phase Shift Keying (DPSK) 274
- 5.3 Differentially Encoded Phase Shift Keying (DEPSK) 277
- 5.4 Quadrature Phase Shift Keying (QPSK) 278
- 5.5 *M*-ary Phase Shift Keying 284
 - Self-Test Questions* 289
- 5.6 Quadrature Amplitude Shift Keying (QASK) 290
- 5.7 Binary Frequency Shift Keying (BFSK) 294

- 5.8 M-ary FSK 300
- 5.9 Minimum Shift Keying (MSK) 303
 - Self-Test Questions* 315
- 5.10 Pulse Shaping to Reduce Interchannel and Intersymbol Interference 315
 - Self-Test Questions* 331
- 5.11 Some Issues in Transmission and Reception 331
- 5.12 Orthogonal Frequency Division Multiplexing (OFDM) 335
 - Self-Test Questions* 340
 - Matlab* 340
 - Summary* 347
 - Problems* 347

6. Random Variables and Processes

351

- 6.1 Probability 352
 - Self-Test Questions* 355
- 6.2 Random Variables 356
 - Self-Test Questions* 369
- 6.3 Useful Probability Density Functions 369
 - Self-Test Questions* 376
- 6.4 Useful Properties and Certain Application Issues 376
 - Self-Test Questions* 389
- 6.5 Random Processes 389
 - Self-Test Questions* 404
 - Matlab* 404
 - Summary* 408
 - Problems* 408
 - References* 415

7. Mathematical Representation of Noise

416

- 7.1 Some Sources of Noise 417
- 7.2 Frequency-domain Representation of Noise 418
 - Self-test Questions* 425
- 7.3 Superposition of Noises 426
- 7.4 Linear Filtering of Noise 429
 - Self-test Questions* 435
- 7.5 Quadrature Components of Noise 436
- 7.6 Representation of Noise using Orthonormal Coordinates 440
 - Self-test Questions* 443
 - Matlab* 443
 - Summary* 446
 - Problems* 446
 - References* 450

8. AM Reception Performance Under Noise	451
8.1 Framework for Amplitude Demodulation	452
8.2 Single Sideband Suppressed Carrier (SSB-SC)	452
8.3 Double Sideband Suppressed Carrier (DSB-SC)	456
<i>Self-test Questions</i>	459
8.4 Double Sideband with Carrier (DSB-C)	460
8.5 Comparison of AM Systems: A Figure of Merit	461
8.6 Threshold Effect in AM Reception	462
<i>Self-test Questions</i>	464
<i>Matlab</i>	465
<i>Summary</i>	468
<i>Problems</i>	468
<i>Reference</i>	471
9. FM Reception Performance Under Noise	472
9.1 An FM Receiving System	473
9.2 Calculation of Signal to Noise Ratio	476
9.3 Comparison of FM and AM	480
<i>Self-Test Questions</i>	482
9.4 Preemphasis and Deemphasis and SNR Improvement	482
9.5 Phase Modulation (PM) and Multiplexing Issues	487
<i>Self-Test Questions</i>	494
9.6 Threshold in Frequency Modulation	494
<i>Self-Test Questions</i>	502
9.7 Calculation of Threshold in an FM Discriminator	502
9.8 The FM Demodulator using Feedback (FMFB)	511
<i>Self-test Questions</i>	515
<i>Matlab</i>	515
<i>Summary</i>	518
<i>Problems</i>	518
<i>Reference</i>	522
10. Phase-Locked Loops	523
10.1 PLL Characteristics	524
10.2 Analog PLL and Frequency Demodulation	525
<i>Self-Test Questions</i>	541
10.3 Digital Phase-Locked Loop	541
10.4 All Digital PLL and Software PLL	545
<i>Self-Test Questions</i>	549
10.5 Applications of Phase-Locked Loops	549
<i>Self-Test Questions</i>	556
<i>Matlab</i>	557
<i>Summary</i>	566
<i>Problems</i>	566
<i>References</i>	569

11. Optimal Reception of Digital Signal	570
11.1 A Baseband Signal Receiver	571
11.2 Probability of Error	573
<i>Self-Test Questions</i>	580
11.3 Optimal Receiver Design	580
<i>Self-Test Questions</i>	589
11.4 Reception of PSK, FSK, QPSK, DPSK Signal	589
<i>Self-Test Questions</i>	597
11.5 Signal Space Representation and Probability of Error	597
<i>Self-Test Questions</i>	610
11.6 Probability of Error Calculation for M-ary Signal	603
11.7 Probability of Error in a QPR System	610
11.8 Comparison of Modulation Systems	614
<i>Self-Test Questions</i>	616
<i>Matlab</i>	617
<i>Summary</i>	619
<i>Problems</i>	619
<i>References</i>	622
12. Noise in Pulse Code Modulation and Delta Modulation Systems	623
12.1 PCM Transmission	624
<i>Self-Test Questions</i>	632
12.2 Delta Modulation (DM) Transmission	632
<i>Self-Test Questions</i>	641
12.3 Comparison of PCM and DM	641
12.4 The Space Shuttle ADM	642
<i>Self-Test Questions</i>	645
<i>Matlab</i>	646
<i>Summary</i>	647
<i>Problems</i>	647
<i>References</i>	650
13. Information Theoretic Approach to Communication	651
13.1 Discrete Messages and Information Content	652
<i>Self-Test Questions</i>	657
13.2 Source Coding and Increase of Average Information	657
<i>Self-Test Questions</i>	662
13.3 Shannon's Theorem, Channel Capacity	662
13.4 Use of Orthogonal Signals to Attain Shannon's Limit	666
13.5 Mutual Information and Channel Capacity	672
13.6 Rate Distortion Theory and Lossy Source Coding	675
<i>Self-Test Questions</i>	679
13.7 Information Theory and Optimum Modulation System	680
13.8 Feedback Communication	685
<i>Self-Test Questions</i>	690
