DIFFERENTIAL EQUATIONS

Second Edition

RICHARD BRONSON

— The perfect aid for better grades!

— Covers all course fundamentals—complements any class text

— Teaches effective problem-solving

— 563 fully worked problems

— Ideal for self-study

MORE THAN
30 MILLION

☒ AP Calculus ☒ Basic Calculus

Contents

Chapter 1	BASIC CONCEPTS	1
	Differential equations. Notation. Solutions. Initial-value and boundary-value problems.	
Chapter 2	CLASSIFICATIONS OF FIRST-ORDER DIFFERENTIAL EQUATIONS	8
	Standard form and differential form. Linear equations. Bernoulli equations. Homogeneous equations. Separable equations. Exact equations.	
Chapter 3	SEPARABLE FIRST-ORDER DIFFERENTIAL EQUATIONS	14
	General solution. Solutions to the initial-value problem. Reduction of homogeneous equations.	
Chapter 4	EXACT FIRST-ORDER DIFFERENTIAL EQUATIONS	24
	Defining properties. Method of solution. Integrating factors.	
Chapter 5	LINEAR FIRST-ORDER DIFFERENTIAL EQUATIONS	35
	Method of solution. Reduction of Bernoulli equations.	
Chapter 6	APPLICATIONS OF FIRST-ORDER DIFFERENTIAL EQUATIONS	43
	Growth and decay problems. Temperature problems. Falling body problems. Dilution problems. Electrical circuits. Orthogonal trajectories.	
Chapter 7	LINEAR DIFFERENTIAL EQUATIONS: THEORY OF SOLUTIONS	67
	Linear differential equations. Linearly independent solutions. The Wronskian. Nonhomogeneous equations.	
Chapter 8	SECOND-ORDER LINEAR HOMOGENEOUS DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS	77
	The characteristic equation. The general solution.	
Chapter 9	n -TH-ORDER LINEAR HOMOGENEOUS DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS	83
	The characteristic equation. The general solution.	

Chapter 10	THE METHOD OF UNDETERMINED COEFFICIENTS	88
	Simple form of the method. Generalizations. Modifications. Limitations of the method.	
Chapter 11	VARIATION OF PARAMETERS	97
	The method. Scope of the method.	
Chapter 12	INITIAL-VALUE PROBLEMS	104
Chapter 13	APPLICATIONS OF SECOND-ORDER LINEAR DIFFERENTIAL EQUATIONS	108
	Spring problems. Electrical circuit problems. Buoyancy problems. Classifying solutions.	
Chapter 14	THE LAPLACE TRANSFORM	125
	Definition. Properties of Laplace transforms. Functions of other independent variables.	
Chapter 15	INVERSE LAPLACE TRANSFORMS	138
	Definition. Manipulating denominators. Manipulating numerators.	
Chapter 16	CONVOLUTIONS AND THE UNIT STEP FUNCTION	146
	Convolutions. Unit step function. Translations.	
Chapter 17	SOLUTIONS OF LINEAR DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS BY LAPLACE TRANSFORMS.....	154
	Laplace transforms of derivatives. Solutions of differential equations.	
Chapter 18	SOLUTIONS OF LINEAR SYSTEMS BY LAPLACE TRANSFORMS	161
	The method.	
Chapter 19	MATRICES	166
	Matrices and vectors. Matrix addition. Scalar and matrix multiplication. Powers of a square matrix. Differentiation and integration of matrices. The characteristic equation.	

88	Chapter 20	e^{At} 175
		Definition. Computation of e^{At} .
97	Chapter 21	REDUCTION OF LINEAR DIFFERENTIAL EQUATIONS TO A FIRST-ORDER SYSTEM 183
		Reduction of one equation. Reduction of a system.
104	Chapter 22	SOLUTIONS OF LINEAR DIFFERENTIAL EQUATIONS WITH CONSTANT COEFFICIENTS BY MATRIX METHODS 191
		Solution of the initial-value problem. Solution with no initial conditions.
108	Chapter 23	LINEAR DIFFERENTIAL EQUATIONS WITH VARIABLE COEFFICIENTS 199
125		Second-order equations. Analytic functions and ordinary points. Solutions around the origin of homogeneous equations. Solutions around the origin of nonhomogeneous equations. Initial-value problems. Solutions around other points.
138	Chapter 24	REGULAR SINGULAR POINTS AND THE METHOD OF FROBENIUS 213
		Regular singular points. Method of Frobenius. General solution.
146	Chapter 25	GAMMA AND BESSEL FUNCTIONS 228
		Gamma function. Bessel functions. Algebraic operations on infinite series.
154	Chapter 26	GRAPHICAL METHODS FOR SOLVING FIRST-ORDER DIFFERENTIAL EQUATIONS 236
		Direction fields. Euler's method. Stability.
161	Chapter 27	NUMERICAL METHODS FOR SOLVING FIRST-ORDER DIFFERENTIAL EQUATIONS 254
		General remarks. Modified Euler's method. Runge-Kutta method. Adams-Bashforth-Moulton method. Milne's method. Starting values. Order of a numerical method.
166	Chapter 28	NUMERICAL METHODS FOR SYSTEMS 272
		First-order systems. Euler's method. Runge-Kutta method. Adams-Bashforth-Moulton method.
